

## Outlook Express

Essential PIM Free combines several functions—calendar, contact manager, to-do list, and notes manager—into one interface. This program performs the functions you'd expect, plus some bonuses like color-coding, drag-and-drop functions, and integrated Microsoft Outlook or Outlook Express data importing. The to-do list allows you to sort and prioritize by category, priority, and completion status. Adjustable program views and several printout options help you keep the data you need at hand. Everything can be password-protected and encrypted with AES 128-bit encryption.

Outlook Express Tweaker helps you customize Outlook Express with some of OE's hidden features and a few of its own. With this plug-in, you can reveal invisible accounts, hidden dialog boxes, and undocumented settings. Outlook Express Tweaker can hide Windows Messenger and enhance the Blocked Senders list interface.

Toolbar Chest for Outlook Express saves your settings, keeping OE customized just for you. Toolbar Chest for OE lets you change the toolbar content, size, and position as well as window positions, layout settings, and more. Once you've got OE looking the way you like, you can back it up with this program, knowing you'll find OE as you left it.
