

POPUP BLOCKER

Pop-Up Stopper Free Edition features a powerful, yet easy to use, interface which allows quick access to its wide variety of features. This version is free for personal use only. Pop-Up Stopper runs in the system tray next to your clock for instant access. Simply right-click the white hand and you will be presented with the menu on the right. From this menu you may access the preferences, monitor your Privacy Report and identity theft risk assessment, check for product updates and more!
