

# WEBSITE DEVELOPMENT

Develop a Personal Website. These days, everybody seems to have a Web site. It's a fun way to carve out your own piece of the Internet. Knowing how to put one together is the tricky part.

At Web Design From Scratch, you will get all the help you need. There are instructions and tips for everyone from novice to pro. Learn simple HTML code or more advanced JavaScript.

Web Design From Scratch offers much more than code. It includes ways of making your site clean and neat. And there are tips for color schemes, logos, text and more.

Don't be timid about making your Website. Once you start, you'll be surprised at how much fun it is.

Setting Up a Website. What could be cooler than having your name or home business surrounded by a "www" and a ".com"? Lots of people hesitate to create a website, thinking that it's extremely technical and requires computer programming skills. Everyone has a friend with a Cousin Vinny who'd be happy to set you up for a small fee, but you really can do it yourself! Learn the simple steps in this Setting Up A Website tutorial:
